

WIRING USING STANDARD 5A CTs SHOWN.  
WHEN USING 5A CTs, ELKOR RECOMMENDS THE USE OF A SHORTING BLOCK.  
mV AND mA (MCT/MSCT) STYLE CTs TYPICALLY DO NOT REQUIRE THE USE OF  
A SHORTING BLOCK AS THEIR OUTPUTS DO NOT PRODUCE DANGEROUS  
VOLTAGE LEVELS.  
ALL CTs MUST BE MOUNTED ON RATED INSULATED CONDUCTORS.
